

OPTICA ACTA

International Journal of Applied and Theoretical Optics

Volume 22

Printed and Published by

TAYLOR & FRANCIS LTD

10-14 MACKLIN STREET · LONDON WC2B 5NF

Founded under the auspices of the International Commission for Optics

CONTENTS OF VOLUME 22

No. 1 January 1975

	PAGE
Blazed interference diffraction gratings for the ultra-violet. M. C. HUTLEY	1
On the contrast of polychromatic speckle patterns and its dependence on surface roughness. H. M. PEDERSEN	15
On the theory of the reconstruction of a weak phase-amplitude object from its images, especially in electron microscopy. I. Isoplanatic imaging. H. A. FERWERDA and B. J. HOENDERS	25
On the theory of the reconstruction of a weak phase-amplitude object from its images, especially in electron microscopy. II. Non-isoplanatic imaging. H. A. FERWERDA and B. J. HOENDERS	35
On images and Fraunhofer diffraction patterns obtained from Fresnel zone plates. G. HARBURN and R. P. WILLIAMS	37
Resonance scattering from an arbitrarily shaped protuberance on a ground plane. A. WIRGIN	47
Photoelasticity using double-exposure polarization holography. H. KUBO, K. IWATA and R. NAGATA	59
A refinement of the simplified particle model theory of diffuse reflectance spectroscopy. E. L. SIMMONS	71
Conference Notice	79
News Item	79
Book reviews	80

No. 2 February 1975

Message from the President of the International Commission for Optics. W. H. STEEL	81
Electro-optical processing in radio astronomy. T. W. COLE	83
Eigenfunction technique for point-like-element pupils. F. GORI and G. GUATTARI	93
Information storage materials for holography and optical data processing. K. BIEDERMANN	103
Apodization of telescopes working in a turbulent medium. M. DE, L. N. HAZRA and P. SENGUPTA	125
Participants	141
Optical synthesis of different wavefronts and production of a Schmidt plate. C. I. ABITBOL and J. J. CLAIR	145
Notice	157
Book reviews	158

No. 3 March 1975

Probleme der beugungsbegrenzten Apertur für die Optimierung des holographisch-optischen Speichers. H. SCHÖNNAGEL	161
The effect of lens aberrations on a coherent optical filter. P. RICHTER and S. TISZA	177
On the loaded Fabry-Perot cavity with finite aperture. H. NEUHAUS and P. NYLÉN	185
Holographic reconstruction of the state of polarization. K. GÅSVIK	189

	PAGE
Fourier transformation in partially coherent light. R. S. SIROHI and V. RAM MOHAN	207
Imaging properties of Selfoc fibres. J. BHUSHAN	211
Strahlungstransport in stark streuenden Medien als Diffusionsvorgang. H. W. BODMANN und P. GERTHSEN	221
Edge-ringing and Fresnel diffraction. E. C. KINTNER	235
Correspondence:	
Laser speckles and the depth-of-field of the human eye. L. RONCHI and A. FONTANA	243
Errata	247

No. 4 April 1975

Editorial

The reproducibility of MTF measurements. A. C. MARCHANT, E. A. IRONSIDE, J. F. ATTRYDE and T. L. WILLIAMS	249
Interlaboratory comparisons of MTF measurements and calculations. P. KUTTNER	265
Use of MTF in the specification and first-order design of electro-optical and photographic imaging and radiometric systems. P. N. SLATER	277
Use of OTF-based criteria in automatic optical design. K.-J. ROSENBRUCH	291
Measurement of sharpness and noise characteristics of X-ray image intensifiers. J. A. J. VAN LEUNEN and J. C. PENNINGS	301
Developments in high resolution thermal optics. M. O. LIDWELL	317
Assessment of materials, components and systems for use in thermal imaging (2-14 μm). T. L. WILLIAMS	327
Modulation transfer function measurement of optical systems in the visible and infra-red (5 to 20 μm) range. J. POULEAU	339
MTF-based criteria for air-camera lens specifications. A. C. MARCHANT	347
Criteria for the evaluation of photographic lenses. H. KONDO, T. WATANABE and H. YAMAOKA	353
Some considerations of the role of the eye as a component of an imaging system. I. OVERINGTON	365
Ministry of Defence experience of introducing MTF into production testing of optical systems. B. A. LEACH	375
Present progress and future prospects in MTF production testing. G. E. JONES	379
Abstracts	387
Meetings Calendar	391
Summer Courses	393

No. 5 May 1975

Ultra-short light pulse focusing and diffraction. V. N. LUGOVOI	395
A Fourier-series approach to moiré patterns with special reference to those produced by overlapping zone plates. G. HARBURN, T. R. WELBERRY and R. P. WILLIAMS	409
Comparative tests concerning the sensitivity and adjustment requirements of optical correlation analysis with holographic and mask methods. R. RÖHLER and M. GALLI	421
On the propagation of wave beams in anisotropic media. J. ČTYROKÝ	435
Optical modulation by surface plasma waves. W. FINK and W. SCHNEIDER	443
Gaussian modes in optical resonators with spherical reflectors. J. SOO HOO	451

Diffraction anomalies and backscattering resonance from an echelette grating. S. JOVIĆEVIĆ and S. SESNIC	461
Correspondence :	
Design of Czerny-Turner spectrographs using divergent grating illumination. M. W. McDOWELL	473
Book reviews	477

No. 6 June 1975

Etude théorique de l'influence de la cohérence partielle sur la reconnais- sance de forme. C. DECKERS	479
Analytical illuminance calculation in a multi-interface optical system. D. L. SHEALY and D. G. BURKHARD	485
The prism-film coupler as a precision instrument. Part I. Accuracy and capabilities of prism couplers as instruments. R. TH. KERSTEN ...	503
The prism-film coupler as a precision instrument. Part II. Measurements of refractive index and thickness of leaky waveguides. R. TH. KERSTEN	515
Second-order statistics of light diffracted from gaussian, rough surfaces with applications to the roughness dependence of speckles. H. M. PEDERSEN	523
Restoration of linear-motion blurred pictures by image scanning method. (Effect of total width of the scanning aperature.) T. HONDA and J. TSUJIUCHI	537
Symposium Report	551
Conference Report	553
Meetings Calendar	557
Book reviews	561

No. 7 July 1975

An interferometer with independently adjustable parameters. W. H. STEEL	563
The design of two shearing interferometers for studying refractive index distributions near opaque boundaries. S. E. GUSTAFSSON and E. KARAWACKI	569
Use of reflection holograms in holographic interferometry and speckle correlation for measurement of surface-displacement. P. M. BOONE ...	579
The moiré pattern formed on superposing a zone plate with a grating or grid. J. M. WALLS and H. N. SOUTHWORTH	591
Aberrations of plane grating monochromators with off-axis paraboloidal mirrors. K. P. MIYAKE	603
The problem of phase retrieval in light and electron microscopy of strong objects. A. J. J. DRENTH, A. M. J. HUISER and H. A. FERWERDA ...	615
Reversible image coding by the use of optical fibres. V. KATSAROS and P. PETALAS	629
Book reviews	637

No. 8 August 1975

Design and operation of holographic techniques for measuring coherence. I. N. ROSS	639
Traitements diélectriques et profilés des surfaces; étude par interférométrie holographique de l'effet déphasage produit. H. DUPOISOT	653
Interferometrische Bestimmung des optischen Brechungsindex n einiger Frigene. W. HERKT, G. MÜLLER und R. WINKLER	667

	PAGE
Polychromatic optical image. Diffraction limited system and influence of the longitudinal chromatic aberration. M. J. YZUEL and J. SANTAMARIA	673
On an iterative method for super-resolution. P. DE SANTIS and F. GORI	691
Resolution of phase particles in phase microscopy. A. BASURAY	697
Two-flux reflectance formulae for semi-infinite diffusers. T. BRIDGEMAN	711
Book reviews	717

No. 9 September 1975

Opto-electronic spatial high-pass filtering. W. SCHNEIDER, H. VAN DER PIEPEN and W. FINK	719
Speckle reduction by unidirectional averaging. M. A. MACHADO GAMA	725
Formation des images électroniques en holographie de Fraunhofer en ligne. Expressions des fonctions de transfert du contraste. P. GALLION, M. TROYON et A. BEORCHIA	731
On the self-weight sag of arch-like structures in the context of light-weight mirror design. D. C. TALAPATRA	745
Determination of the eigenfunctions of a homogeneous integral equation with non-symmetric kernel. A. HARDY, F. PASQUALETTI and L. RONCHI	761
Puissance diffusée par deux sphères. J. DALMAS	767
Invariant properties of the motion parallax field due to the movement of rigid bodies relative to an observer. J. J. KOENDERINK and A. J. VAN DOORN	773
Book reviews	793
Meetings Calendar	797

No. 10 October 1975

Automatic measurement of vertex refraction with coherent light. A. F. FERCHER and H. SPRONGL	799
On direct measurements of strain and rotation in holographic interferometry using the line of complete localization. M. DUBAS and W. SCHUMANN	807
Thermal self-focusing/defocusing of a laser beam in an absorbing moving medium: convection effects. S. C. KAUSHIK, V. K. TRIPATHI and R. P. SHARMA	821
The use of Buchdahl's retardation coefficients. C. J. WOODRUFF	831
Etude numérique et vérification expérimentale de la diffraction par un système dièdre-miroir. M. VAMPOUILLE	841
On atmospheric turbulence and the problem of optimization of the telescopic pupil. M. DE and L. N. HAZRA	853
Multifentes vibrant parallèlement à la direction de dispersion et adaptables sur les spectrographes et spectromètres. C. MILAN	867
Correspondence:	
A new technique for sealing magnesium fluoride to metals. G. H. C. FREEMAN, M. G. NICHOLAS and T. M. VALENTINE	875
Minutes of a Meeting of the Bureau of the International Commission for Optics held in Tokyo, 27 August 1974	877

No. 11 November 1975

Incoherent optical matrix multiplication. W. SCHNEIDER and W. FINK	879
A new diving-mask with improved threshold perceptibility. H. MULDER	891

	PAGE
Radiation from a parabolic mirror collimator. R. TANTERI and A. WIRGIN	897
Polychromatic off-axis optical image. Influence of the transverse chromatic aberration. M. J. YZUEL and J. BESCÓS	913
A comparison, using orthogonal coefficients, of two forms of aberration balancing. C. J. WOODRUFF	933
On the diffraction efficiency of synthetic binary holograms. R. S. SIROHI and H. BLUME	943
Effect of curvature on dispersion in multimode parabolic index fibres. A. KUMAR, I. C. GOYAL and A. K. GHATAK	947
Obituary	953
Conference Report	955
Announcement	956
Conference Announcement	957
Meetings Calendar	959
Book reviews	961

No. 12 December 1975

Contrast and linearity modification in photo-resists by physicochemical means. L. H. TORRES CRUZ	963
Index of refraction of tantalum oxide in the wavelength interval 2750–14000 Å. J. M. ALBELLA, J. M. MARTÍNEZ-DUART and F. RUEDA	973
Effect of source size and spectral width on the irradiance distribution in the defocused image of a grating. R. GROUSSON and S. MALICK	981
Systematic interpolative design of a complex optical system of the triplet type. A. L. H. ALDERSEY	989
A simple Fourier approach to Fraunhofer diffraction by triangular apertures. R. M. SILLITTO and W. SILLITTO	999
Phase multiplication. A new sensitive method for interference microscopy. M. A. KHASHAN	1011
Conference Report	1035
Minutes of the 10th Session of the International Commission for Optics held on 28 and 29 August 1975 at Prague, Czechoslovakia	1037
Book reviews	1041
Index of authors (with titles)	1047
